Task Sorter - User Guide

Oct 26, 2026 · @Teo Zen Ben

Sort the pile before it buries you. Task Sorter is a fast card game for Android. Every card is a real-life job. You swipe it into one of four corners, and the game teaches you which jobs matter and which are just loud.

Made by Tan Louis for the UMPSA x HUAWEI GameCenter Mobile App Competition 2026, Category A. Version 1.0.

TASK
SORTER

Install

Task Sorter comes as an APK file (an Android app file), about 4 MB. It runs on Android 7.0 or newer, in portrait.

1. Copy `app-debug.apk` to your phone, or download it there.
2. Tap the file. If Android asks, allow your browser or file manager to **install unknown apps** (Settings > Apps > Special app access > Install unknown apps).
3. Tap **Install**, then **Open**.

The game asks for no permissions while you play. It holds two that Android grants at install: **Internet** (only for the optional online save) and **Vibrate** (the buzz when a card lands).

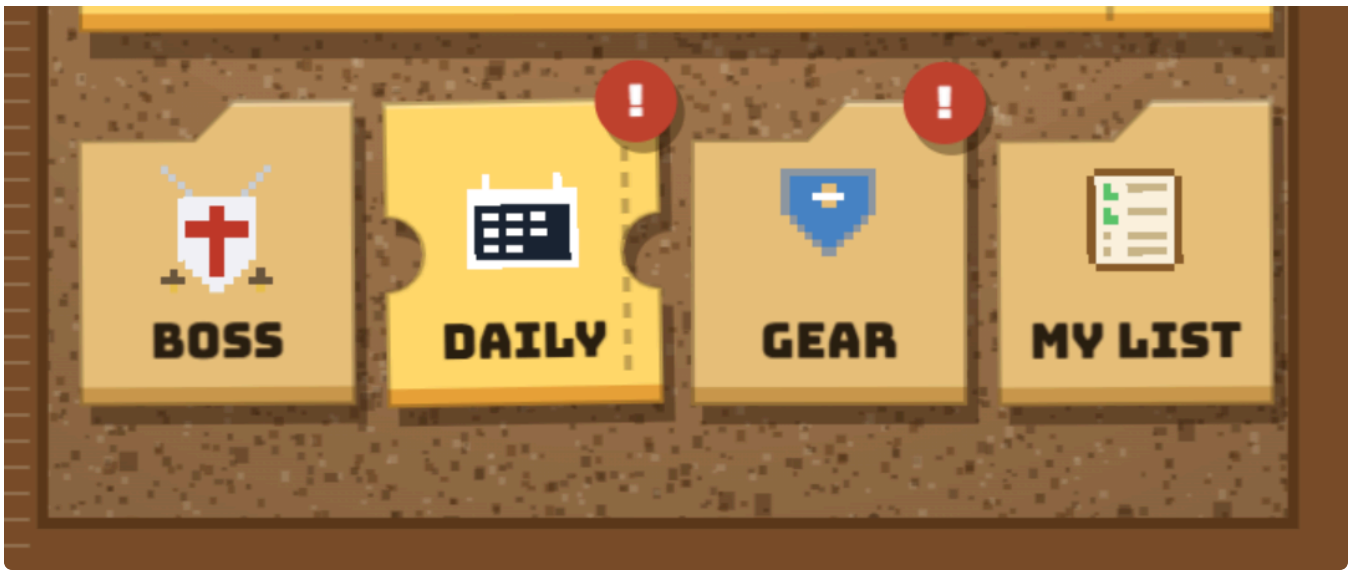

It works offline. All art, sound and levels are inside the app. Only the online save needs a connection.

The game is for Android phones only. There is no iPhone app.

First launch

1. The title screen builds the logo. **Tap anywhere** to start. Sound only begins after this first tap.
2. You land on the **home screen**: your character, a big **PLAY** button, and four doors under it: **BOSS**, **DAILY**, **GEAR** and **MY LIST**. Top-left are the **cog** (Settings) and the **target** (Missions).
3. Tap **PLAY** to open the map. Tap Level 1, then **PLAY** on its card.

6

HELLO, MY NAME IS
Kai
6
PLAY

Your first round teaches you. The first time you play Level 1, the first four cards are one for each corner. The right tray glows and a moving dot shows the drag. After those four it is a normal round. This happens once.

The full rules are in the **Guide Book**: Settings > The rules > Guide Book.

No account is needed. Your progress saves on the phone by itself.

How to play

A card shows a job, like "Homework due at 8am". Ask two questions: **Does it matter?** and **Does it have to be now?** The answers point to one corner.

Corner	Where	Means	Example
Do Now	top-left	matters and is due today	Homework due at 8am
Do Later	top-right	matters, but not yet	Exam in 3 weeks
Give Away	bottom-left	urgent, but not your job	The bin, on your brother's night
Drop	bottom-right	neither	Checking who viewed your story

Controls

- **Drag** the card into a corner. The tray you aim at grows and lights up before you let go.
- **Flick** it. A quick short throw counts, in the direction you threw.
- **Tap a tray** to send the card there.

- **Keyboard** (browser only): Q = top-left, W = top-right, A = bottom-left, S = bottom-right. Escape or P pauses.
- A very short drag snaps back, so a stray touch costs nothing.

Scoring

- Each right card is worth 100 points, plus up to 100 for speed.
- **Perfect**: right in 1.2 seconds or less. +150 points.
- **Combo**: every right card in a row raises your multiplier, up to x8. One wrong card drops it back to x1.
- **Final rush**: the last part of a timed level (up to 20 seconds) pays **double**. The screen shows RUSH x2.

Passing a level

Only **accuracy** decides if you pass: the share of cards you got right. Speed and score never do.

Grade	Needs	Stars
S	95% right and a combo of 12 or more	3
A	85% right	2
B	70% right	1
C	under 70%	1 (if you still reached the pass mark)

A failed run is not saved and costs nothing. Only passes count toward your best grade and stars.

When you miss

The card bounces off and the tray it belonged in lights up while you keep playing. Every miss is kept for the end of the round.

The results screen

You see your grade, stars, score, accuracy, best combo and coins. Then pick **NEXT LEVEL**, **PLAY AGAIN** / **TRY AGAIN**, or **MAP**. Tap anywhere to skip the animation.

If you missed any cards, tap **WHAT YOU MISSED**. Each row shows the card, what you chose, and the reason. The right corner is hidden: tap **Tap to see the answer** once you have had a think. A card missed twice shows as one row with x2.

Pause

Tap the yellow sticky note (top-left of the round), or press the phone's **back** button. The clock stops. Choose **RESUME**, **RESTART** or **QUIT TO MAP** (**LEAVE FIGHT** in a boss fight). You can also change the background here. Quitting records nothing. If you leave the app mid-round, the round pauses itself.

Levels and twists

The map is a trail of four levels, the **Day to Day** pack. Pass a level to unlock the next. Each level is a place, and only that place's jobs turn up. Each one adds one new twist and keeps the ones before it.

Level	Place	Clock	Cards	Pass mark	New twist
1	In the House	none, ends after 20 cards	easy	60%	Golden cards
2	At School	60 s	easy, medium	65%	Frozen cards
3	On Your Phone	75 s	easy, medium, hard	70%	Burning cards
4	Out in Town	90 s	medium, hard	75%	Trays swap every 18 s

860
4
B
OUT IN TOWN

On the map, a blue marker is open, a gold marker is passed (with your best grade and stars), and a grey padlock is locked. A dashed red ring marks the next level to play. Tap a locked level and it says which level to beat first.

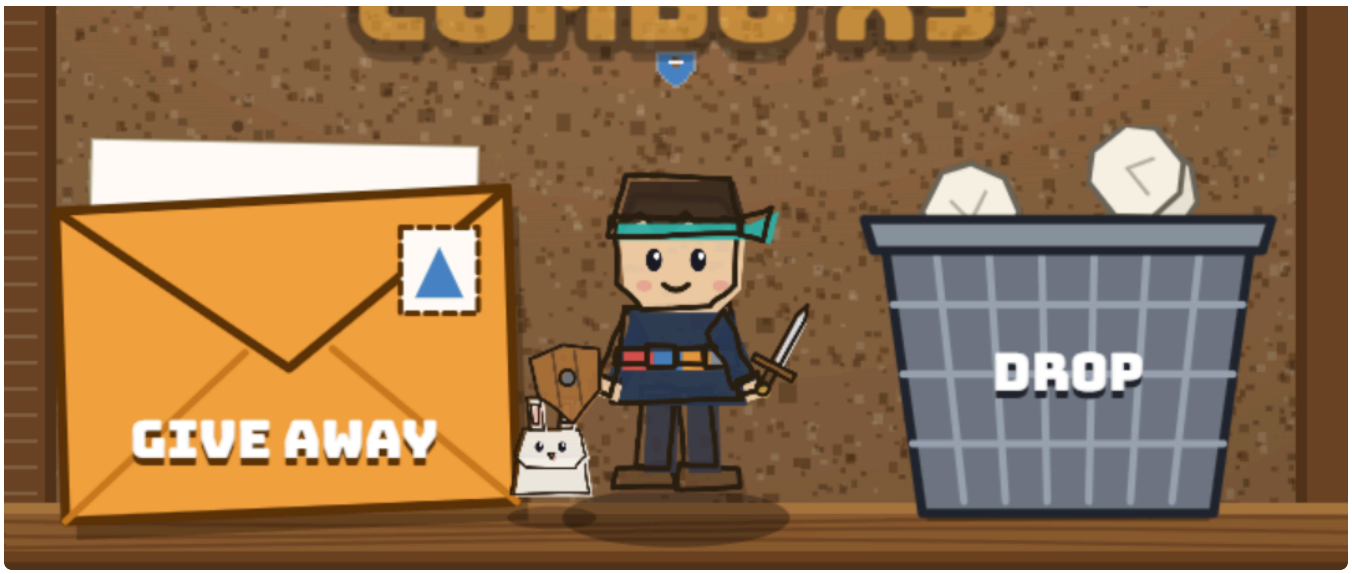

Stars. Your total stars show on a ruler on the home screen, out of 12 (three per level).

Special cards

A special card shows what it is by its look, not by words.

Card	Looks like	What to do	From
Golden	gold paper	Sort it right for **triple points** and **+5 coins**.	Level 1
Frozen	covered in ice	**Tap the card** to crack it (2 taps, or 1 with a Longsword or better), then sort it. Its speed timer starts once the ice breaks.	Level 2
Burning	a fuse along the top	Sort it within about 3.4 seconds. If the fuse runs out, it counts as a miss.	Level 3
Trays swap	two trays slide past each other	Two trays change corners. Your swipes follow the trays to their new places. No swap happens in the last 5 seconds.	Level 4

A pet makes golden cards a little more likely. A shield covers a burnt card, because a burnt card counts as a wrong answer.

Boss battles

Tap **BOSS** on the home screen. Swipe or use the arrows to flip between the bosses, then tap **FIGHT**. Sticky Steve is open from the start. Beat a boss to unlock the next.

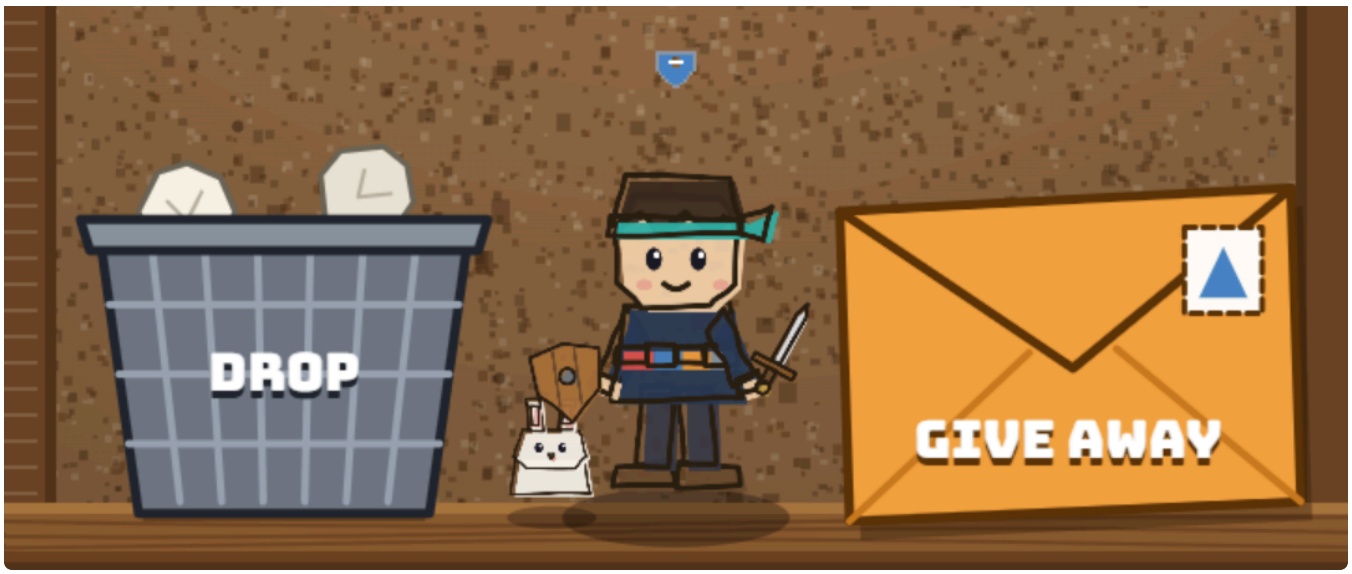

A boss fight is a sorting duel with two health bars and a 60-second clock. You both have to deal with the same kind of cards.

- **You sort right:** you hit the boss for 12 damage, or 18 if you were quick (1.2 s or less). Golden cards and your weapon hit harder.
- **You sort wrong:** you take 10 damage. A shield blocks it.
- **The boss sorts on its own clock.** Watch the bar under the boss. When it fills, the boss swings, and hits you if it got its card right.
- **First health bar to empty loses.** If time runs out, whoever has more of their own health left wins.

Boss	Health	Sorts every	Gets right	Trick
Sticky Steve	100	2.6 s	60%	**Sticky Fingers**: glues your card down. Tap it free.
Clip Carla	120	2.0 s	72%	**Reshuffle**: swaps two of your trays.

Boss	Health	Sorts every	Gets right	Trick
Inbox Ivan	140	1.5 s	82%	**Inbox Flood**: hides the words on your trays for 6 s.
Deadline Dan	160	1.1 s	92%	**Deadline**: sets your card and the next two on fire.

DO LATER
Sort your school files before exams

The first trick comes about 4.5 seconds in, then every 9 to 11 seconds.

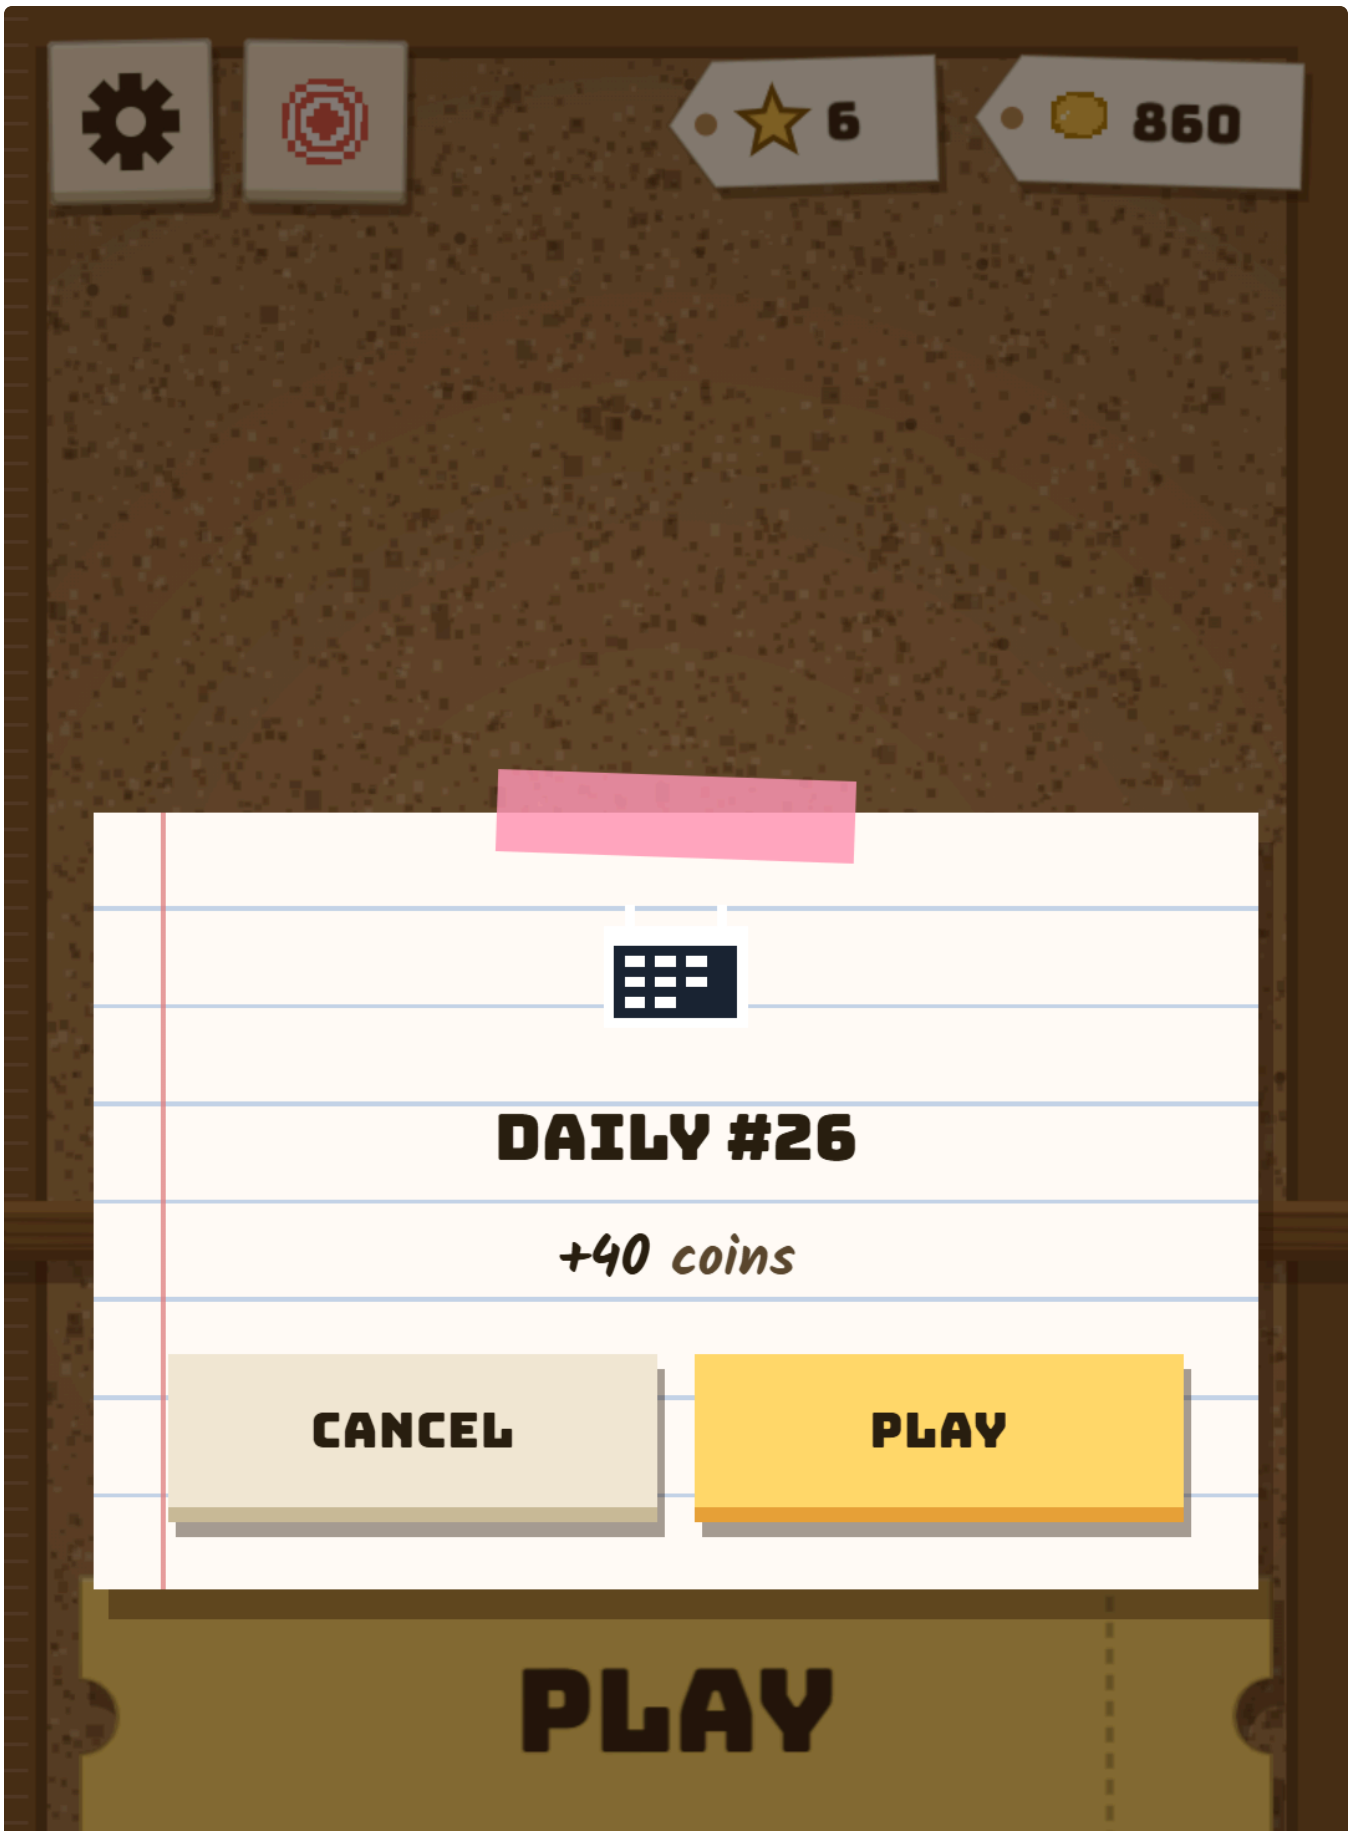

Coins: a win pays 120 coins for Steve, plus 60 more for each boss after him. A loss still pays a fifth of that.

Online Boss is the fifth page. It is marked **Coming soon** and is not playable yet. Tapping it explains why.

Daily Challenge

One round a day, with the **same cards for every player** that day. It is the fair place to compare scores with friends.

- **Unlocks** when you pass Level 1. Before that, the DAILY door tells you to pass Level 1.
- When today's round is waiting, the **DAILY** door turns gold with a **!**.
- Tap it to see today's number (Daily #1 was 1 October 2026) and the coin bonus, then tap **Play**.
- **75 seconds**, cards from all four places, and every twist: golden, frozen and burning cards, and trays that swap every 20 seconds.
- There is no pass mark. Results show your score, your best today, accuracy and best combo.

DAILY #26
+40 coins
CANCEL
PLAY
PLAY

Streak and bonus. Your first finish each day adds 1 to your streak if you also played yesterday. Miss a day and it starts again at 1. That first finish pays a bonus of **40 coins + 15 for each streak day after the first**, up to a 7-day streak (130 coins). Replays can beat your best score but do not pay the bonus again.

"Today" follows your phone's own date.

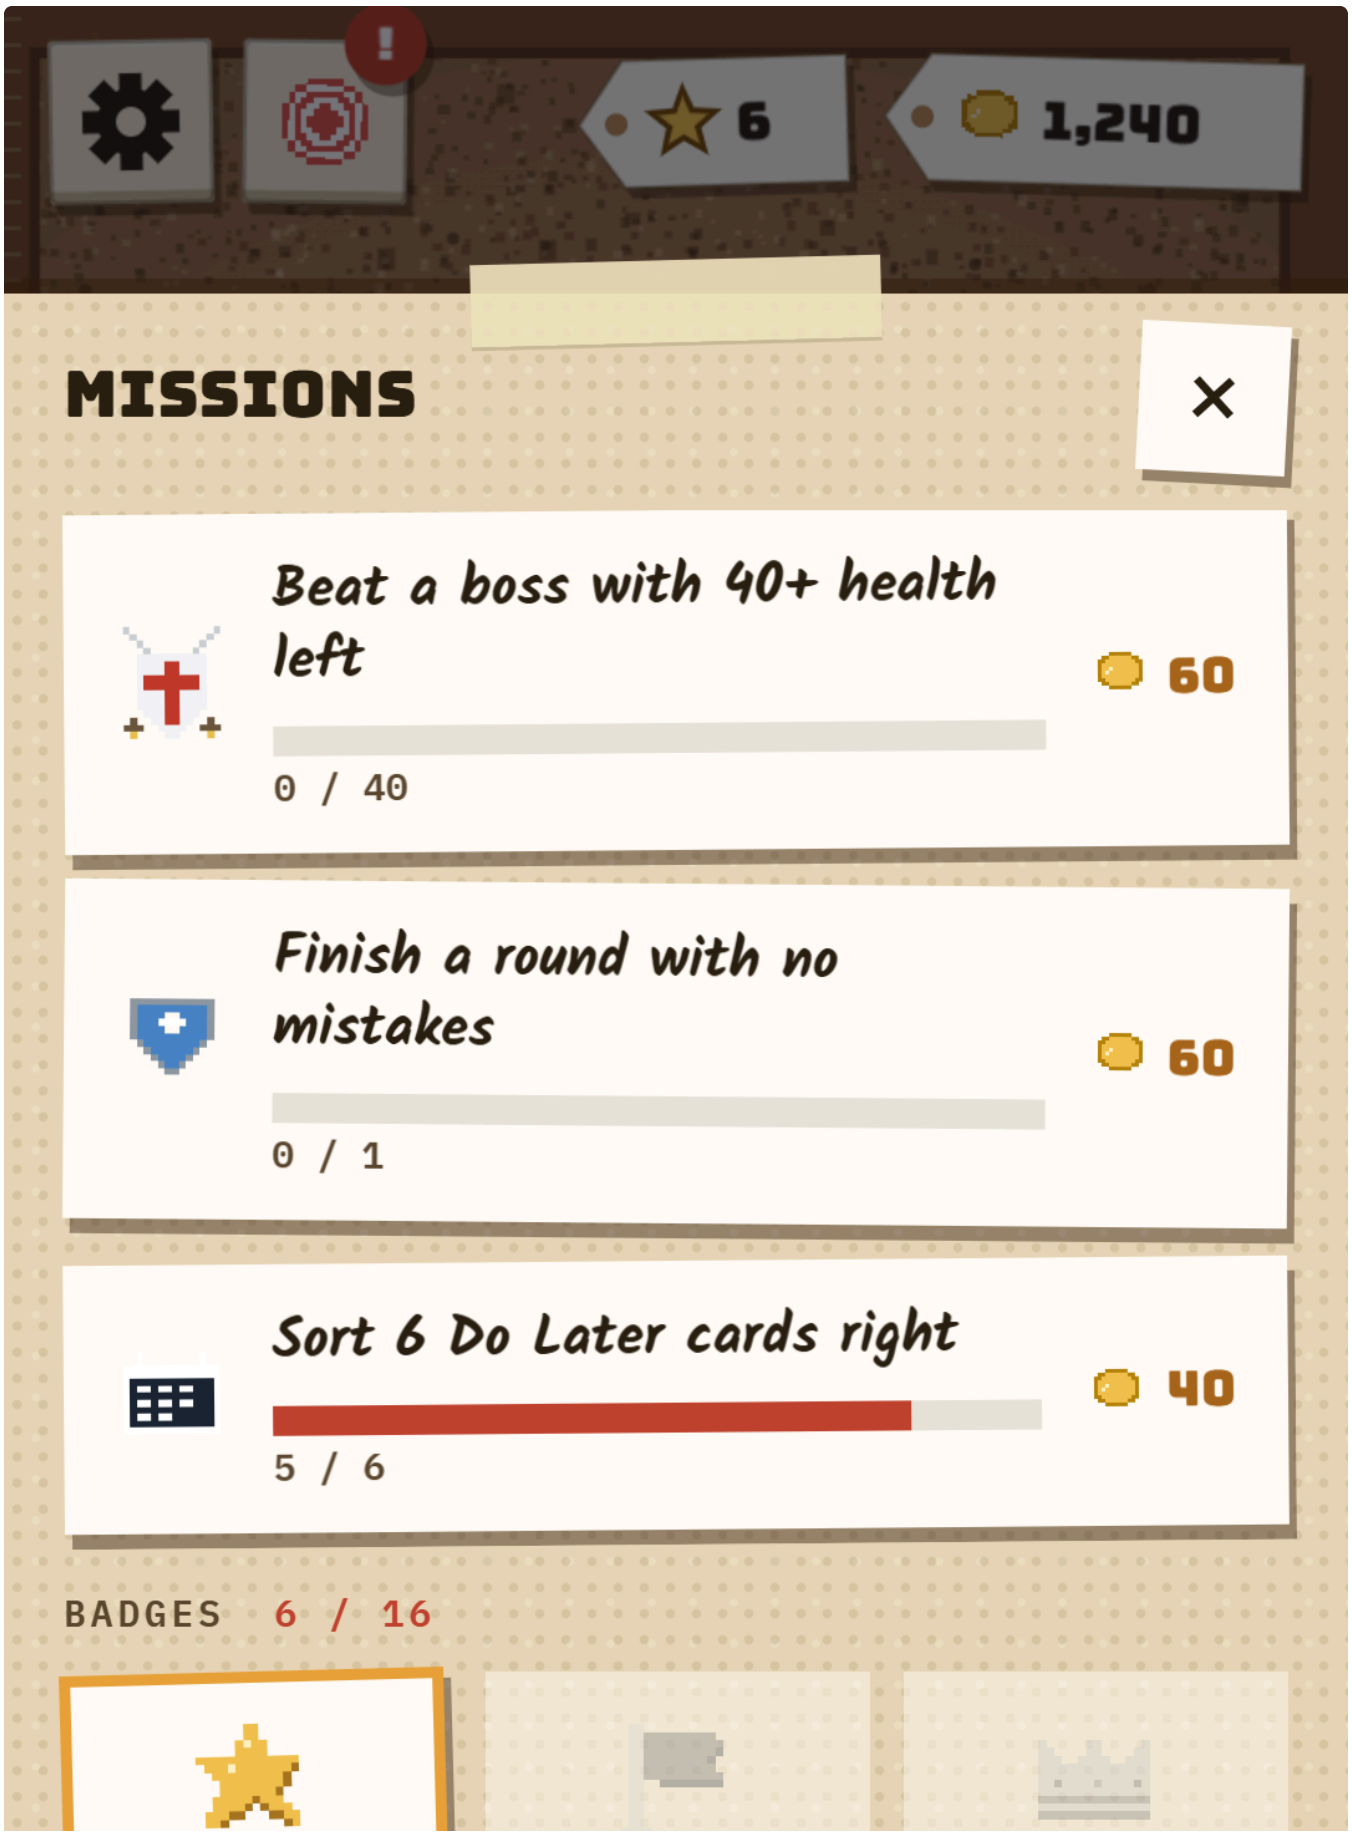

Missions and badges

Tap the **target** next to the cog on the home screen. It shows a red **!** when a mission has finished since you last looked.

Missions

Three missions are always running. Finish one and its coins are paid with that round, shown on the results screen. A new mission takes its place. After every 4 you finish, new ones get harder.

Examples: *Get 5 Perfects in one round*, *Reach a x5 combo*, *Sort 30 cards right*, *Sort 6 Do Later cards right*, *Crack 3 frozen cards*, *Finish a round with no mistakes*, *Beat a boss*, *Play the Daily Challenge*, *Score 6,000 in one round*. Some count across many rounds; others must be done in one. Rewards run from 40 to 110 coins.

Badges

Badges are earned once and kept. There are 16.

Badge	How to earn it
First Steps	Pass Level 1
Trailblazer	Pass every level
Perfectionist	Get an S on every level
Unstuck	Beat Sticky Steve
Boss of Bosses	Beat every boss
On Fire	Reach a x8 combo
Lightning	15 Perfects in one round
Spotless	A round with no mistakes (at least 10 cards)
Future You	Sort 50 Do Later cards right
Gold Digger	Sort 25 golden cards
Ice Breaker	Crack 25 frozen cards
Regular	A 3-day daily streak
Habit	A 7-day daily streak
For Real	Sort your own to-do list

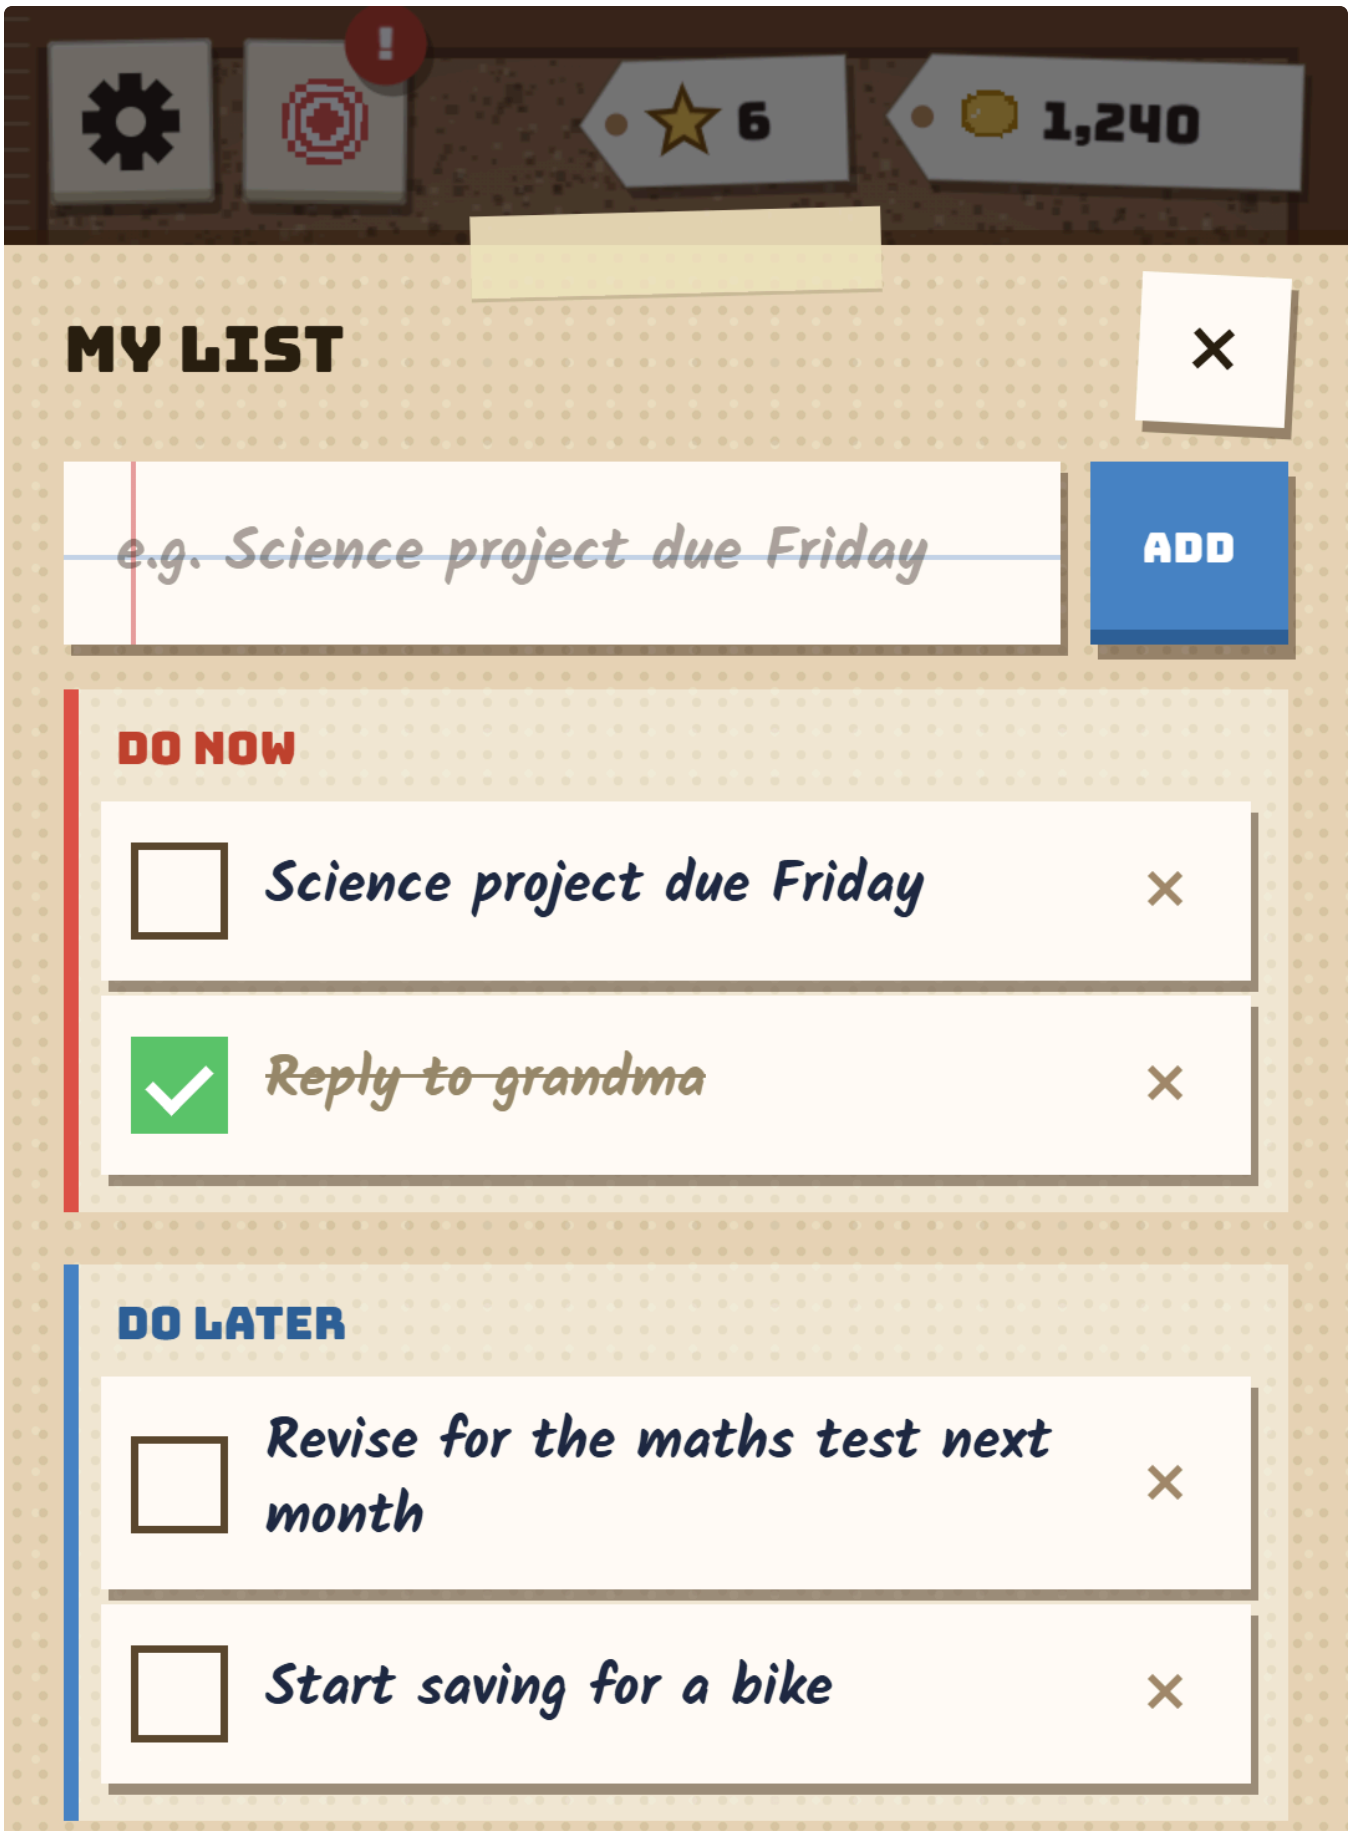

Badge	How to earn it
Zookeeper	Own 5 pets
Saver	Have 1,000 coins at once

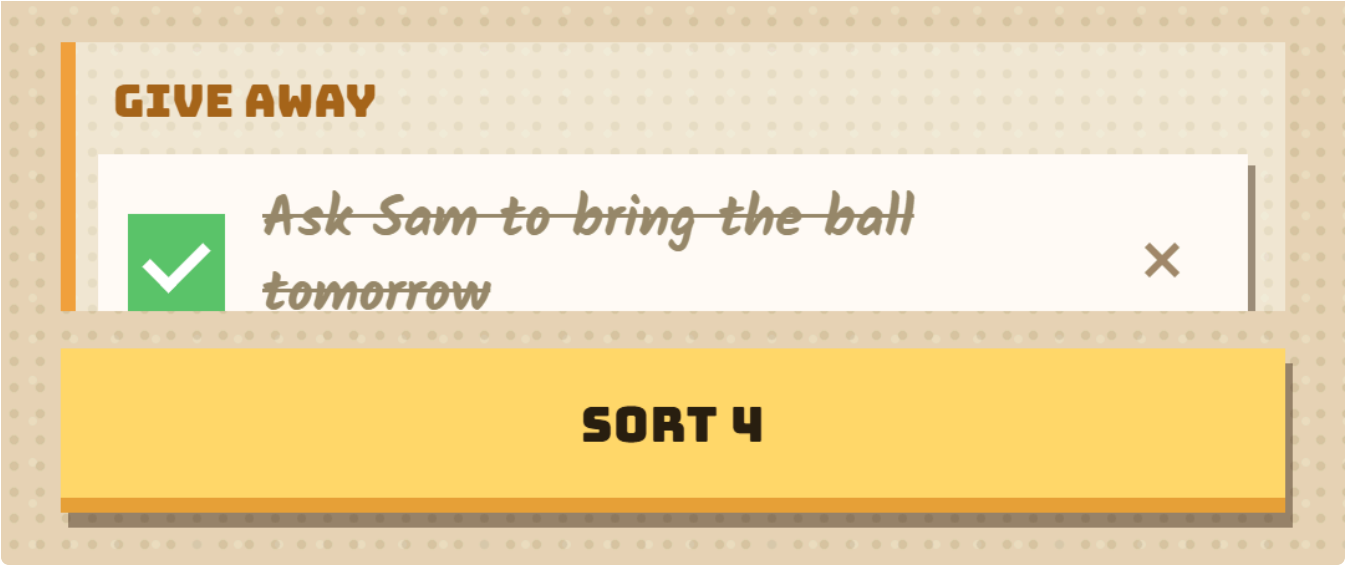

My List

My List uses the four corners on your **real** week. Nobody marks it, because only you know your own life. There is no clock, no score and no wrong answer.

1. Tap **MY LIST** on the home screen.
2. Type a job (up to 60 letters), for example "Science project due Friday", and tap **Add**. You can keep up to 30.
3. Tap the gold **Sort** button at the bottom. It shows how many jobs are waiting, e.g. **Sort 4**.
4. Each job comes up as a card. Put it in whichever corner you choose.
5. At the end, My List opens again with your jobs in four piles: Do Now, Do Later, Give Away and Drop.

Tap the box beside a job to tick it done. Tap **x** to remove it. **Clear the done ones** removes every ticked job. When every job has a corner, **Sort** lets you sort all the unfinished jobs again.

Your list stays on your phone. It only leaves the phone if you sign in to save online.

Gear and pets

Tap **GEAR** on the home screen. Your character stands at the top and changes outfit as you tap. Under it: a **NAME** box (tap to name your character, up to 14 letters), then the shop on three tabs: **PETS**, **ARMOUR** and **WEAPONS**. At the bottom, **What your gear does** shows the effect of what you wear.

You wear one item in each slot. Tap an item to buy it (it is put on at once), tap an owned item to wear it, or tap **None / Bare Hands** to take it off. A locked item says what unlocks it, e.g. "Reach level 3" or "Beat Clip Carla".

860
NAME Kai
FULL SET +25% coins
PETS
ARMOUR
WEAPONS
None
Duck
Kitten

Slot	What it does	Range
Weapon	More points per card, and harder hits on a boss. Longsword or better cracks ice in 1 tap.	+10% (Dagger, 100 coins) to +75% (Winged Blade, 1,500 coins)
Armour	A shield covers wrong answers so they do not count against your accuracy or combo. In a boss fight it blocks the damage. Missed cards still show in the review.	covers 1 (Wood Shield, 120) to 5 (Diamond and Gold Shield, 1,500) per round
Pet	More coins and a few more golden cards, but **your clock runs faster**: less time, fewer cards, smaller score. The faster clock applies to Levels 2-4 and the Daily, not to Level 1 or boss fights. The extra golden cards do not apply to the Daily, so it stays the same for everyone.	Duck: +8% coins, -6% time (120) up to Phoenixling: +60% coins, -55% time (2,000)

Full set: wear a pet, armour and a weapon together for **+25% coins**.

There are 13 pets. The five common pets (Duck, Kitten, Mushroom, Hatchling, Bunny) can be bought from the start. Rare and epic pets need you to reach Level 2, 3 or 4. The three legendary pets (Polar Bear, Dragon, Phoenixling) need you to beat a boss. Pets you own but are not wearing wander around the home screen.

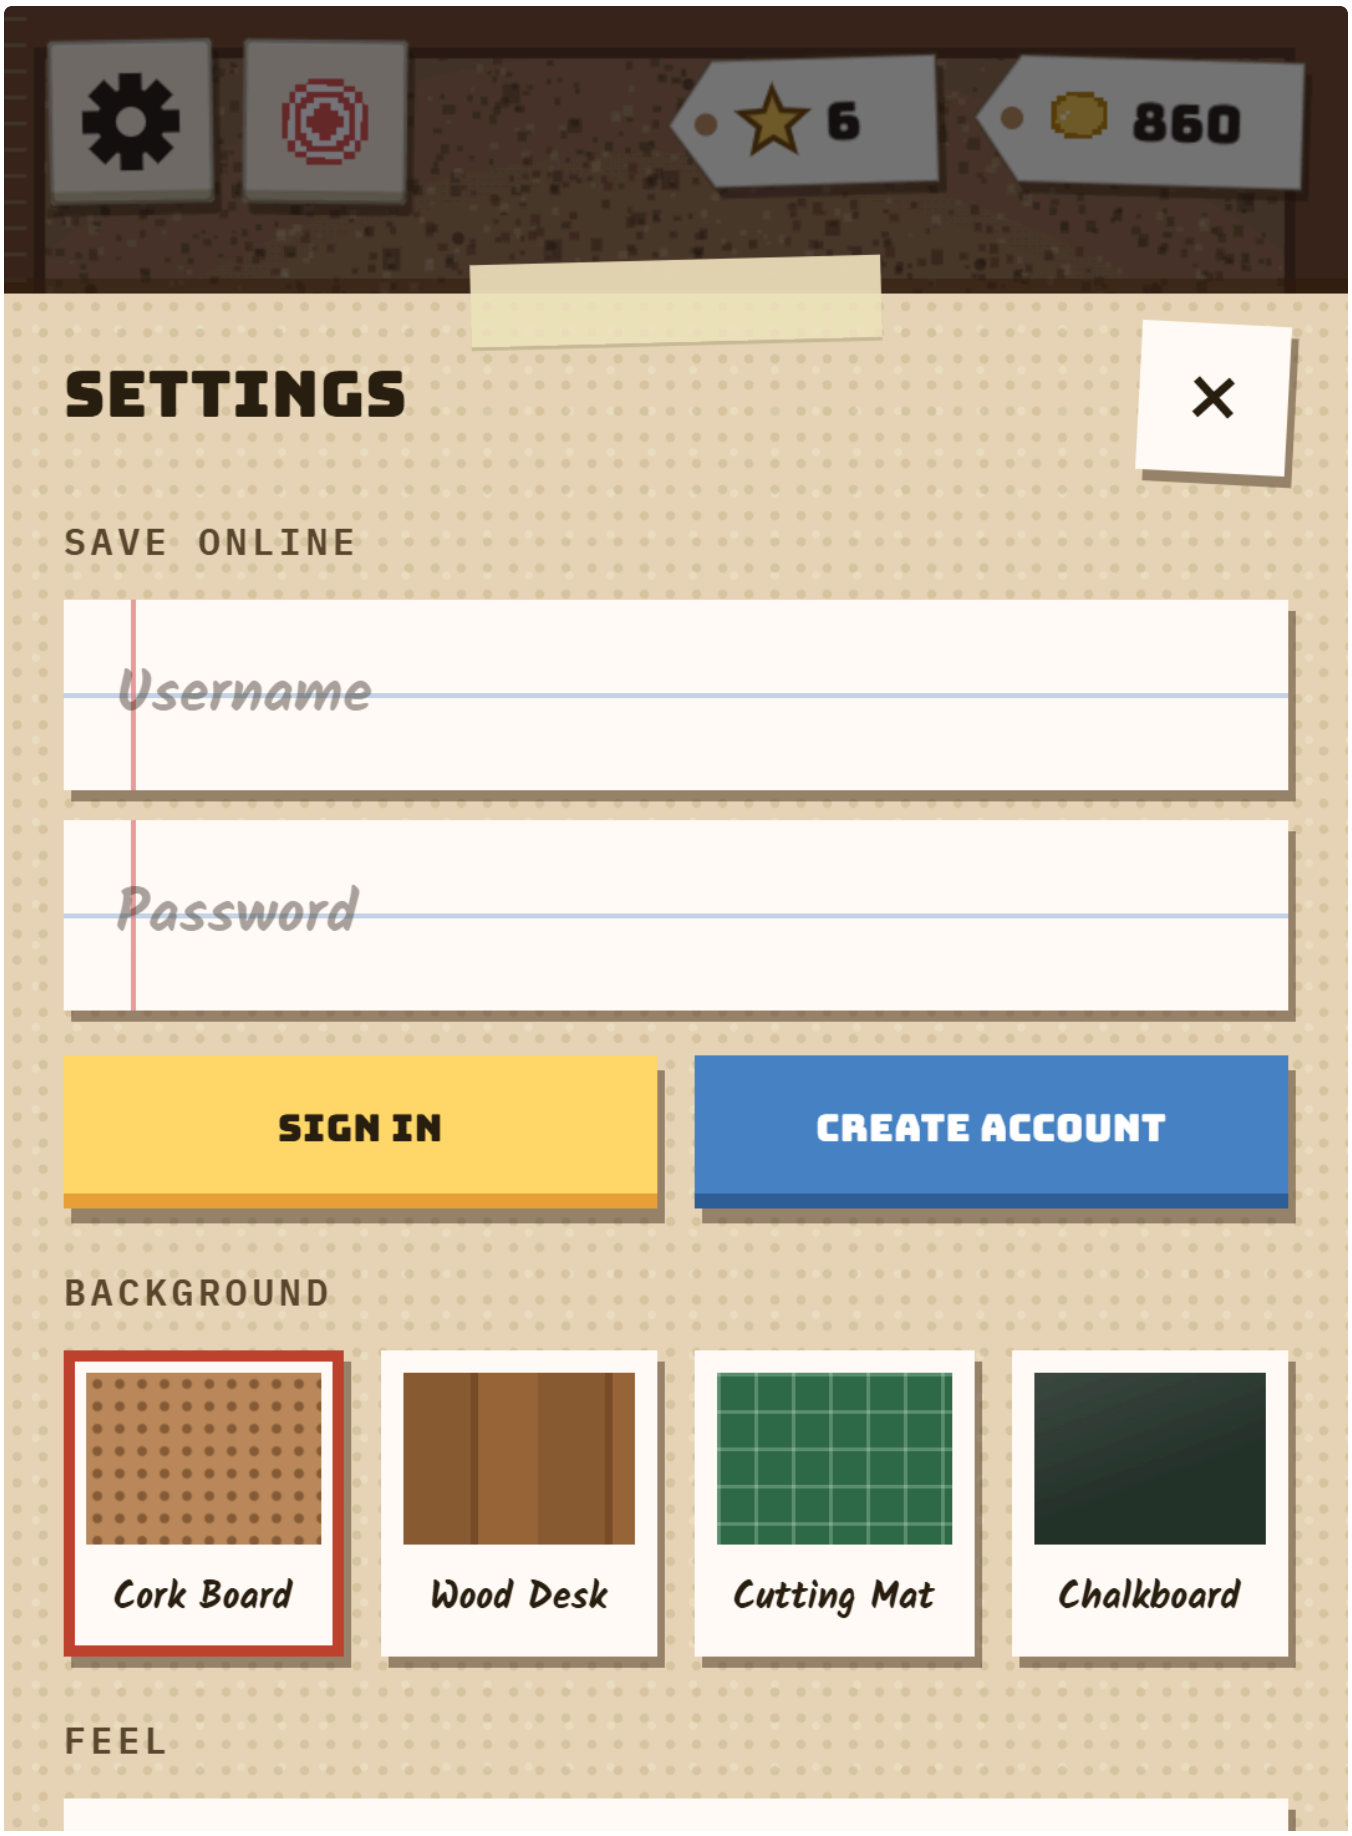

Coins

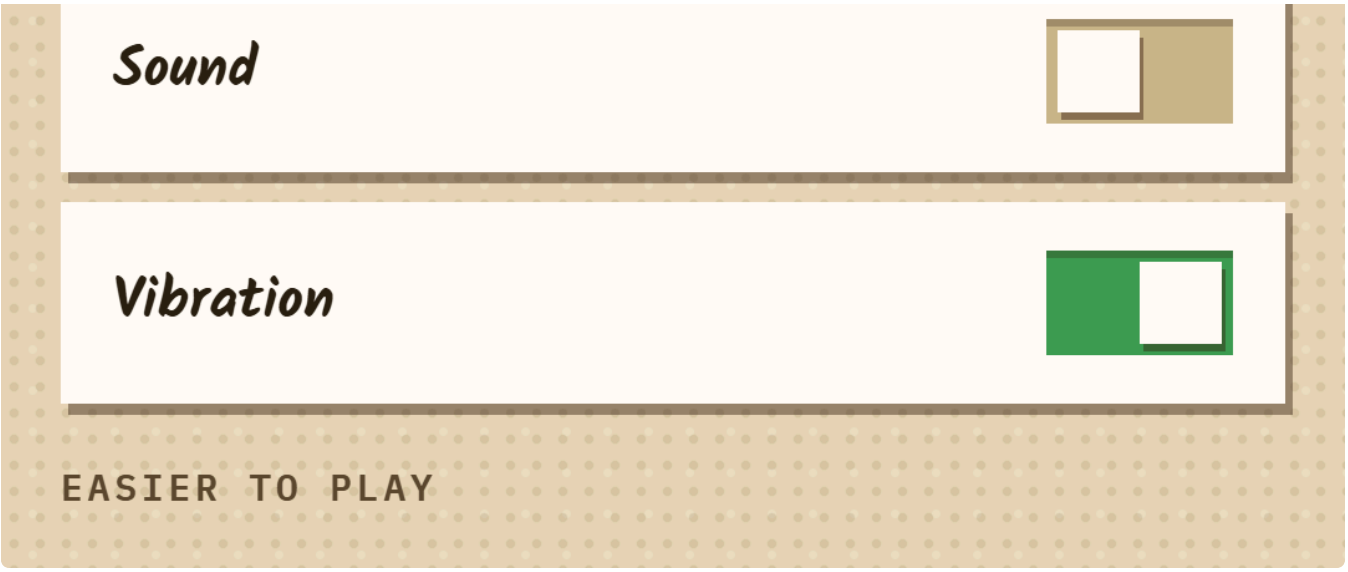

- **Levels and Daily:** 1 coin per 500 points, plus a grade bonus (S 50, A 35, B 20, C 8). Paid even if you do not pass.
- **Golden cards:** +5 each. **Missions:** 40 to 110. **Daily bonus** and **boss** coins: see those sections.
- Your pet's coin bonus and the full-set bonus raise level, Daily and boss pay.

Settings and accessibility

Tap the **cog** on the home screen. Every setting saves at once.

Setting	What it does
Save online	Optional account, so your progress follows you to another device. See below.
Background	Four desks to play on: Cork Board (default), Wood Desk, Cutting Mat, Chalkboard. Also changeable from the pause menu.
Sound	Turns all music and sound effects on or off.
Vibration	Turns the buzz on or off (a tap when a card lands, a double knock on a mistake).
Bigger text	Larger words on the cards, the trays and every menu sheet.
Calm screen	No screen shake, no freeze-frames, no zoom punches, and softer red flashes. Your phone's own "reduce motion" setting does the same.
Guide Book	The rules as a short book. Turn pages with Back and Next.
Reset all progress	Deletes every level passed, coins, gear, pets and your character's name. It asks first. There is no undo.

Save online

- Choose a **username** (3 to 14 letters, numbers or _) and a **password** (at least 6 characters). Tap **Create account**, or **Sign in** if you have one.
- **No email address** or other personal details are asked for.
- If the account is new, the progress on this phone is uploaded to it. If the account already has progress, **that progress replaces what is on this phone**. The game tells you which one happened.
- After that, changes upload by themselves while you are online.
- **Sign out** keeps your progress on this phone.
- With no internet, the game plays exactly the same and saves on the phone.

HUAWEI services

HUAWEI Game Service is not connected in this build. There is no live HUAWEI leaderboard or achievement list yet.

What is in place: the app has a bridge ready for it. Every badge is sent to the bridge as an achievement, and every Daily score and passed-level score is sent as a leaderboard score (boards `daily` and `level1` to `level4`). For now the bridge only writes these to the phone's system log. Connecting it needs a HUAWEI developer account and an AppGallery Connect project, which are not part of this build.

Nothing in the game depends on it. Your badges, scores and progress all work and save on the phone either way.

Troubleshooting and FAQ

Problem or question	Answer
Android will not install the APK	Allow your file manager or browser to install unknown apps (see Install), then tap the file again.
There is no sound	Tap the screen once (sound waits for your first tap). Check **Sound** in Settings and your phone's media volume.
My card will not move	It is frozen. Tap the card until the ice breaks.
My swipe went to the wrong tray	On Level 4, the Daily and against Clip Carla the trays can swap. Look before you swipe.
The next level is still locked	You need the pass mark (60% to 75%). The results screen tells you the number.
Daily is locked	Pass Level 1 first.
I cannot buy an item	Its tag says why: not enough coins, or a level or boss to beat first.
My rounds feel shorter	Your pet speeds up the clock. Tap **None** on the Pets tab to take it off.
The back button	Closes a menu, pauses a round, or goes back a screen. On the home screen it closes the app.
Does it need internet?	No. Only the online save does.
Will I lose progress if I close the app?	No. It saves on the phone after every change. Uninstalling the app or clearing its data deletes the save, unless you saved online.
Is there a leaderboard?	Not yet. Compare Daily Challenge scores with friends, since everyone gets the same cards that day.
Can I play against a real person?	Not yet. Online Boss is marked Coming soon.
Can I turn the phone sideways?	No. The game is portrait only.

Credits

Made by Tan Louis. A solo entry.

- The four corners are the **Eisenhower Matrix**, a well-known way to sort jobs by how much they matter and how urgent they are.
- All music and sound effects are made in code while you play. There are no recorded audio files.
- Characters, bosses, pets and gear are drawn by the game itself.
- Built for UN Sustainable Development Goal 4, **Quality Education**: a life skill, free, for anyone, with no account needed.
- Entry for the UMPSA x HUAWEI GameCenter Mobile App Competition 2026, Category A.
